## Make your clinild a Maths Star!

A parents' guinde to lhenping yourcheindren with Maths

Booklet 2 of 3:

Key Stage 2<br>Year 3 to Year 4

## c!it wasm't linke thiss whem Mas ATschool!

Have you ever wished that you understood current Maths methods better? Many parents find that their children are using methods or strategies, which are very different from those used in the past. This can often cause confusion when trying to support your child at home.

The main methods used in each year group by the majority of pupils for addition, subtraction, multiplication and division are shown. These methods are introduced throughout the teaching year so most pupils should be familiar with all methods by the end of the year. Each sheet also shows typical maths vocabulary that children will be acquiring and using at this stage.

This is a guide only, children will always progress at different speeds. However, support from you will undoubtedly be of great benefit to them at all times. If you have any questions, your child's teacher will be pleased to discuss the strategies with you.
N.B. If you have downloaded this booklet to print it, you may need to expand your print margins slightly to make it fit.

## Turn your child into a Mathemagician!

## YEAR 3 - Addition

Number line (left to right)
$78+7 \quad(7=2+5)$
Jump forward to the next ten
$78+7=85$

Partitioning: Splitting into tens and units

|  | 75 | + |
| ---: | :--- | ---: |
|  |  | 48 |
| $=$ | $70+5$ | + |
| $=$ | $40+8$ |  |
| $=$ | $110+40$ | + |
| $=$ | $5+8$ |  |

Use the same method for HTU + HTU
$364+123$
$=300+60+4+100+20+3$
$=300+100+60+20+4+3$
$=400+80+7$
$=487$

## Vocabulary:

add, addition, more, plus, make, sum, total, altogether, how many more to make...? how many more is... than...? Numberline, partition, hundreds, tens, units, count on.

## YEAR 4 - Addition

Numberline (left to right)
78+27 (27=10 + $10+7$ )

78+27=105
Expanded partition 175 + 248

Write sum vertically

## Partitioning

Step 2
$175=100+70+5$
$+248=200+40+8$
$423300+110+13$
Column Addition
Step 4

## Recombine

Expanded column (units first)
$175+248$
175
$+248$
13 ( $5+8=13$ )
110 ( $70+40=110$ )
$300(100+200=300)$
423
Compact column (most able only)
$175+248$

175
$+248$
423
11

For the middle column children are taught to say " $70+40+10=120$ Rather than
" $7+4+1=12 "$

## Vocabulary:

add, addition, more, plus, increase, sum, total, altogether, score, adjust, near double, how many more to make...? numberline, partition, hundreds, tens, units, count on

## YEAR 3 - Subtraction

## Numberline (right to left) <br> (when subtracting with large difference)

$83-7 \quad(7=3+4)$
Jump back to the nearest 10 first

$83-7=76$
Some children may be shown this method for counting on.
Find the difference (left to right)
(when subtracting near numbers)

84-56

Start from 56 and count on until reaching 84
$4+10$
$+10+4=$
84-56
= 28

## Vocabulary

$\square$ subtract, subtraction, take (away), minus, leave, how many are left/left over? one less, two less... ten less... one hundred less how many fewer is... than...? how much less is...? difference between, equals, sign, is the same as, tens boundary, hundreds boundary, gap

## YEAR 4 - Subtraction

## Expanded Partition (no exchanging)

Numberline for HTU - TU and HTU - HTU
354-168

Expanded partitioning (no exchanging)

$85-31=54$
Expanded partition with exchanging

181-57

$$
\begin{array}{rll}
181 & = & 70 \quad 11 \\
-\frac{57}{124} & =\frac{\text { say: }}{100+80+\gamma} & \text { "80 exchanges to } 70 \text { and 10"" } \\
100+20+4 &
\end{array}
$$

The children are taught to

Compact column (most able only)

$$
181-57
$$

$-\quad \frac{57}{124}$

## Vocabulary:

subtract, subtraction, take (away), minus, decrease, leave, how many are left/left over? difference between, how many more/fewer is... than...? how much more/less is...? is the same as, tens boundary, hundreds boundary, inverse

## YEAR 3 - Multiplication

Tables: x2, x3, x4 x5, x10
Working out multiplications using an array: $4 \times 3$
3 rows of $4 \quad$ or 4 rows of 3

$4 \times 3=12$
Repeated addition using a number line.
$4 \times 3$ (4 jumps of 3)

$4 \times 3=12$
Grid Method (Teens x U)
$13 \times 8$ (13 partitions to 10 and 3)

( $80+24=104$ )
$13 \times 8=104$

## Vocabulary:

lots of, groups of, times, multiply, multiplication, multiplied by multiple of, product, once, twice, three times... ten times... times as, repeated addition, array, row, column, double, grid method

## YEAR 4 - Multiplication

Tables: x6, x7, x8, x9
Grid method:
$23 \times 8$
$23=20+3$

## 

More able moving to TU x TU
$23 \times 28$

$$
23=20+3
$$

|  | x | 20 | 3 |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| $28=20+8$ | 20 | 400 | 60 | - 644 | $400+60=460$ |
|  | 8 | 160 | 24 |  | $160+24=184$ |

Total: 644
Partitioned short multiplication TU x U (Units first)
$23 \times 8$
23
X $\quad 8$
24 (8×3)
160
$(8 \times 20)$
184
$23 \times 8=184$

## Vocabulary:

lots of, groups of, times, multiply, multiplication, multiplied by, multiple of, product, once, twice, three times... ten times... times as, repeated addition, array, row, column, double, grid method, short multiplication.

## YEAR 3 - Division

Try to give your child plenty of hands on and practical activities in real life situations, such as sharing a packet of 12 biscuits between 3 people.

Sharing and grouping using arrays:
$12 \div 3$
$14 \div 3$

Each person gets 4 biscuits.

Each person gets 4 biscuits and 2 left over.

Repeated subtraction using a horizontal number line:
$15 \div 5$

3 jumps of 5
so $15 \div 5=3$
With a remainder: $15 \div 4$

3 jumps of 4 and 3 left over
$15 \div 4=3$ r 3

## Vocabulary:

share, share equally, one each, two each, three each... group in twos, threes... tens, equal groups of, divide, division, divided by, divided into, left over, remainder, halve, arrays, jumps, repeated subtraction.

## YEAR 4 - Division

## Division facts from tables and fact families

e.g. $2 \times 9=18$
$9 \times 2=18$
$18 \div 2=9$
$18 \div 9=2$
Repeated subtraction along a horizontal number line
TU $\div \mathbf{U}$
$48 \div 4$

12 jumps of 4 so $48 \div 4=12$
(Also with remainders, see Year 3 example)
Moving to a vertical number line
$48 \div 4$
$50 \div 4$

More able moving to chunking

$48 \div 4=12$
$48 \div 4$

$10 \times 4$
$2 \times 4$
$48 \div 4=12$

## Vocabulary:

Halve, share, share equally, one each, two each, three each... group in pairs, threes... tens, equal groups of, divide, division, divided by, divided into, remainder, factor, quotient, divisible by, inverse, halve, fact families, chunking.

The following are some suggested websites that can help support your child's maths.

BBC Maths
